

Patient Testimonials

John D.

“This program has meant everything to me. I have someone I can call when ever I need advice and they know me. They call me every week and then when my sugar goes up I always get a call, even on the weekend! It helps me to know that someone is watching out for me. I think of them now before I eat and am able to plan my foods better now. I couldn't have done this without House Calls.”
